DETAILED ACTION

Claim Objections

Claim 11 is objected to because of the following informalities: In claim 11, the last line, no antecedent basis could be found for "the expander". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4,7,8,14,15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Mocivnik et al Wo 98/58132 (cited by applicant).

Mocivnik discloses a method and apparatus for drilling and fixing an anchorage. A hole is formed by means of a drill bit 1. The bit is mounted on a drill rod assembly and a jacket tube 3,4 surrounding the drill rod assembly is simultaneously introduced. The jacket tube has a single longitudinal slot 14 and is introduced in substantial abutment with the drill hole during drilling. As to claim 4, the jacket tube is introduced by exerting a tensile stress through connection of the tube with the bit. As to claim 7, a setting suspension is introduced into the assembly. As to claim 8, jacket tube 3,4 surrounds the drill rod assembly that carries bit 1. As to claim 7, the jacket is fixed to the bit impact shoe. As to claim 15, the jacket tube is made of prestressed material. As to claim 17, the claim language does not preclude a reading of opening 14 being both

the longitudinal slot and the opening for introducing excavated soil or rock into the interior of the jacket tube.

Allowable Subject Matter

Claims 2,3,5,6,9-13 and 16 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 1,4,7,8,14,15 and 17 have been considered but are moot in view of the new ground(s) of rejection.
